

The Commercial Vehicle Group (CVGI) is a global leader in commercial vehicle system solutions for the heavy-duty truck, construction, agricultural, industrial, marine, and specialty industries. We take pride in building products the same way that we've built our company – with commitment, strength and focused direction.

We're successful because we are committed to continuous improvement. We aren't afraid to take chances with modern processes that may improve the tried and true. We are immersed in technology in every market we serve. We're growing, penetrating emerging markets, and constantly in pursuit of innovation that will improve, shape, and define the future of the global commercial vehicle industry.

We are currently seeking an experienced **Enterprise Resource Planning (ERP) Systems Analyst** at our corporate headquarters in New Albany, Ohio.

In this role, the incumbent will:

- Act as formal point of contact/liaison and technical expert between the plant operations and developers and is responsible for the communication and coordination with all associated parties.
- Research vendor products to stay current on new and existing functionality.
- Gather and translate functional requirements into technical design documents.
- Document current business processes and develop recommended re-engineered business processes.
- Design solutions to business problems that leverage Baan delivered functionality first before considering custom changes and enhancements, considering future product capabilities in those designs.
- Work with developers to understand and produce deliverables that match the functional requirements.
- Identify and support integrations between both internal and external systems.
- Develop and execute test scripts as necessary.
- Train users on new development(s) within the application; may develop related training materials.
- Troubleshoot production support issues and conduct root cause analysis, which may include activities such as writing audit queries through Baan SQL, and other report writing software.
- May lead and manage projects for assigned initiatives.
- Other duties as assigned or requested.

Requirements:

- Bachelor's degree in Computer Science, Information Systems, Business Administration, Mathematics or related field and 3 years of professional level experience in Enterprise Systems Analysis of applications to include:
 - Gathering and translating functional requirements into technical design documents for an integrated technology software system environment including systems interfaces from Enterprise to non-Enterprise applications,
 - Documenting current process and developing recommendations for re-engineered business processes,
 - Application troubleshooting, relational database knowledge and writing SQL,
 - Creation of test procedures and working with functional users to complete.
- Experience in Baan IVC4 or greater in a manufacturing environment is preferred.
- Emphasis on MRP, scheduling, shipping, and scanning.
- Experience with project management is a plus.
- Proficient in Microsoft Office (Microsoft Project and Excel), Baan SQL, and CyberQuery.

- Strong written, verbal/interpersonal communication and presentation skills; able to properly communicate across multiple levels of the organization.
- Excellent organizational and time management skills attention to detail, and work efficiency.
- Ability to be flexible, adhere to tight deadlines, and prioritize work in order to support concurrent objectives and goals.

Sponsorship is not available for this position at this time.

Our eligible associates enjoy competitive wages and benefit package including comprehensive medical, dental, vision, 401(k) plan, company paid life insurance, paid holiday and vacation time off.

Resumes may be submitted as directed below. Include the job title in all submissions.
